

Name the solution: _____

What problem does the solution(s) solve?

What is the problem?

Why is it a problem?

To whom is it a problem?

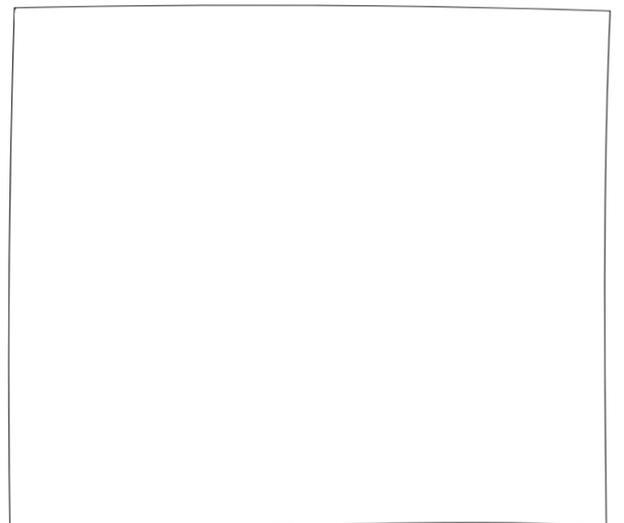

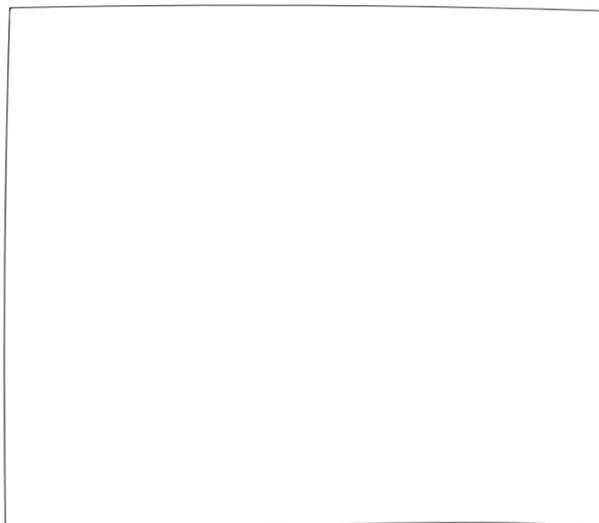

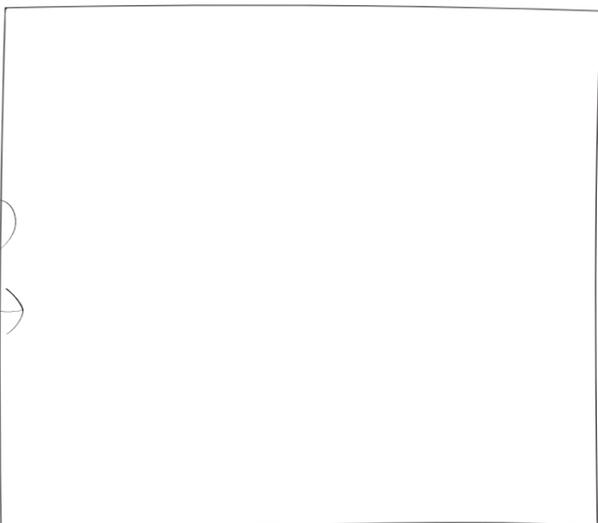

How could the problem be solved?

What is the solution?

Why does it solve the problem?

Who is involved?

What are the 5 most important steps to implement the solution? Describe as precise as possible what is necessary for the problem to be solved (including what needs to be clarified).
